installation and administration of suggestion plans.

Personnel relations are an important part of the job of the administrator, and an effective suggestion plan is a sound way to improve personnel relations. In this newly revised 22-page booklet from the AHA, the benefits, philosopy, rules, and mechanics of suggestion plans are covered in detail. In addition, one section covers methods of promoting a suggestion plan among employees.

This pamphlet is an important addition to your reference library. It tells you not only how to implement a suggestion plan but why hospitals across the country are finding them valuable.
